PROFESSIONAL LAWN TREATMENTS SCHEDULE PLANNER

FIVE STEPS TO A HEALTHIER GREENER LAWN

STEP #1

Fertilizer with Pre-emergent Crabgrass Control - Pre-emergent herbicides should be applied in spring for control of **Crabgrass, Barnyard Grass, Foxtail** and Other Annual Grassy Weeds. In most seasons, treatment deadline is mid-April for central Ohio.

STEP #2

Spring Fertilization & Broadleaf Weed Control - Weeds must be actively growing for herbicides to be effective. Consistent temps. above 50 degrees.

STEP #3

Summer Fertilization and Broadleaf Weed Control
Lawn Insect Control - Is also applied during the Summer Fertilization. This is to protect your Green Healthy Lawn from **Surface Insects** (Bluegrass Billbug Larvae and Chinch Bug) and **Subsurface Insects** (Grubs and Sod Webworm).
Establish a Good Watering Practice - Minimum of 1" of water a week.

STEP #4

Late Summer Fertilization & Broadleaf Weed Control - Broadleaf weeds will resume growth with cooler temperatures and Moisture. Fall is often the best time to control weeds since the grass fills in as the weeds die.

This is also the best time for Overseeding and Lawn Renovations

STEP #5

Late Fall Fertilization (Winterizer) - Grass should still be green and air temperatures typically below 55 degrees. This is the Most Important Fertilization of the year for turfgrass.

HELPFUL LAWN CARE MAINTENANCE TIPS TO A GREAT LAWN

Spring - Lawn Clean Up, Seeding & Overseeding and Aeration.
 Mowing - Spring 2.5 to 3". Raise cutting height to 3.5" minimum in Summer to provide shade to root system. Cut often enough to remove no more than 1/3 of grass blade per cutting. In the Fall lower cutting height back to 2.5 to 3" & for the Final Mow of the year at 2.5". Remember to keep you blades sharp.
Establish a Good Watering Practices - Water in the Early Morning maintaining 1" minimum, weekly to keep lawn from going into dormancy.
